TOUCH SCREEN SANITISER

3 IN 1

**CLEANS, SANITISES
+ PROTECTS**

BioProtect® Touch Screen Sanitiser is a unique and powerful multi-application cleaner, sanitiser and antimicrobial protectant. The revolutionary formula and active ingredients make it perfectly suited for use on touch screens, phones and computers, protecting the screens from harsh chemicals but at the same time gentle and powerful enough to be used as a long-lasting hand sanitiser. After application it produces a durable bonded coating with long lasting antimicrobial properties.

**EFFECTIVE AGAINST 99.99%
OF GERMS**

**LONG LASTING PROTECTIVE
COATING**

PROTECTS FOR 200+ TOUCHES

**FORMULATED TO SCREEN
MANUFACTURER GUIDELINES**

THREE IN ONE

CLEANS // This superior formulation effectively cleans away dirt, oils, fats, grease, germs and bacteria from screens, leaving them clean and smudge free.

SANITISES // Effective against 99.99% of bacteria and germs and is one of the safest and widest ranging bacteria inhibiting sanitisers available.

PROTECTS // Provides superior long-lasting protection from germs for both screens and hands to reduce contact transmission of pathogens.

SCREENS & DEVICES

- Phone handsets
- Keyboards & mice
- Laptops
- Tablets & eReaders
- ATMs
- Gaming machines
- Point of sale displays
- Check-in touch screens

KEY FEATURES

- ✓ **3 IN 1 CLEANER, SANITISER, PROTECTOR**
- ✓ **EFFECTIVE AGAINST 99.99% OF GERMS**
- ✓ **CONTAINS 0.13% BENZYL AMMONIUM CHLORIDE**
- ✓ **IDEAL FOR SCREENS AND HANDS**
- ✓ **COMMERCIAL GRADE SANITISER**
- ✓ **LONG LASTING PROTECTIVE COATING**
- ✓ **QUICK DRYING**
- ✓ **PROVEN TO BE ACTIVE FOR 200+ TOUCHES**

LONG LASTING PROTECTIVE COATING

BONDS TO SURFACES // Once dried, a clear long-lasting protective coating is formed on the screen to offer superior protection to the user, reducing the transmission of germs from user to users.

BioProtect® Touch Screen Sanitiser is designed to dry quickly without smudging or fogging up the screen. The unique formulation has been designed in line with manufacturers recommendations and wont impact the integrity of screens or touchpads.

ENVIRONMENTALLY FRIENDLY

BLEACH & CHLORINE FREE // BioProtect® Touch Screen Sanitiser is free of the harsh chemicals found in most disinfectants, such as bleach, ammonia, and chlorine. The powerful antimicrobial formula is non leaching once it has dried and tethered to a surface.

PRODUCT COMPARISON

	BIOPROTECT®	REGULAR PRODUCTS
PRINCIPLE	Physical and electrochemical disruption of cells	Dehydration/corrosion utilising PH, chemical disruption
METHOD	Attracts, pierces and kills pathogens	Poisons pathogens
DURABILITY ON SURFACES	Proven effective for up to 200 touches	Short term effectiveness
TOXICITY	Extremely low toxicology particularly once tethered to a surface	Usually high toxicity
EASE OF USE	Ready and easy to use	Require mixing with most being toxic and dangerous to mix
ENVIRONMENTAL	Safe to use - Non leaching once dry on a surface	Most are toxic to the environment and will leach from the surface
COST SAVINGS	Due to the longevity of action, exceptionally low cost in use	Seem inexpensive to purchase initially but when efficacy and longevity are considered are expensive
