

HOSPITAL GRADE SURFACE DISINFECTANT

EFFECTIVE AGAINST COVID-19

KILLS 99.99% OF GERMS

PRODUCT OVERVIEW

TGA Listed Hospital Grade Surface Disinfectant that creates a protective barrier to withstand scrubbing and abrasion. It has been extensively tested to be effective against Covid-19 and 99.99% of germs. Can be used as a hospital grade disinfectant or diluted for regular, daily use.

PRODUCT BENEFITS

The invisible barrier reduces cleaning time and cleaning costs and has been tested to be effective against 99.99% of germs including COVID-19. Remains on surfaces for more than 60 scrub cycles with a sponge and 40 scrub cycles with microfibre cloths.

WHERE TO USE

Any surfaces that require cleaning and sanitising.

& Owned

HOW TO DILUTE

For TGA Listed (Hospital Grade) Disinfectant: Do Not Dilute

For Standard Disinfectant Cleaner: Add 150mL to a 750mL spray bottle and top up with clean water.

DIRECTIONS FOR USE

For TGA Listed (Hospital Grade) Disinfectant:

- Spray, mist or wipe directly onto surface and allow to dry.
- For greater protection, reapply after the first application has dried.

For Standard Disinfectant Cleaner:

- Use as a daily cleaner/disinfectant to maintain the antimicrobial coating.

SAFETY & PPE

PPE: Wear protective gloves and eye protection.

Safety: Wash contaminated skin thoroughly after handling.

Always take care when handling any chemicals.
